Sure! Here's a ready-to-upload **website folder structure** you can turn into files for GitHub Pages:

---

1. index.html

```html
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Sammoya's Homepage</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <nav>
    <h1 class="logo">Sammoya 💻</h1>
    <ul>
      <li><a href="#about">About</a></li>
      <li><a href="#interests">Interests</a></li>
      <li><a href="#contact">Contact</a></li>
    </ul>
  </nav>

  <section id="about">
    <img src="https://i.imgur.com/8Km9tLL.png" alt="Profile Picture">
    <h2>Hey, I'm Sammoya 🚬</h2>
    <p>I'm a high school student learning how to code and build cool websites!</p>
  </section>

  <section id="interests">
    <h2>Things I Like</h2>
    <ul>
      <li>Music 🩳</li>
      <li>Anime 🍔</li>
      <li>Coding 💻</li>
    </ul>
  </section>

  <section id="contact">
    <h2>Contact Me</h2>
    <p>Reach out at <a href="mailto:sammoya@example.com">sammoya@example.com</a></p>
  </section>
```

```
    </body>
    </html>
```

2. style.css

```css
body {
  background: #f8f7ff;
  font-family: 'Poppins', sans-serif;
  margin: 0;
  padding: 0;
  text-align: center;
  color: #333;
}

nav {
  background-color: #6a0dad;
  color: white;
  padding: 15px 0;
  display: flex;
  justify-content: space-around;
  align-items: center;
}

nav ul {
  list-style: none;
  display: flex;
  gap: 20px;
}

nav ul li a {
  color: white;
  text-decoration: none;
  font-weight: bold;
}

nav ul li a:hover {
  text-decoration: underline;
}

section {
  padding: 40px 20px;
}

img {
  width: 150px;
```

```css
    border-radius: 50%;
    margin: 20px 0;
}

button {
    background-color: #6a0dad;
    color: white;
    padding: 10px 20px;
    border: none;
    border-radius: 8px;
    cursor: pointer;
}

button:hover {
    background-color: #8b2be2;
}
```

Instructions: 1. Create a folder on your computer called `my-website`. 2. Inside, create `index.html` and `style.css` files. 3. Copy the HTML code into `index.html` and the CSS code into `style.css`. 4. Upload the folder to GitHub following the GitHub Pages steps I gave you.

Once uploaded, your website will be live online! 🍓
